Wickets®
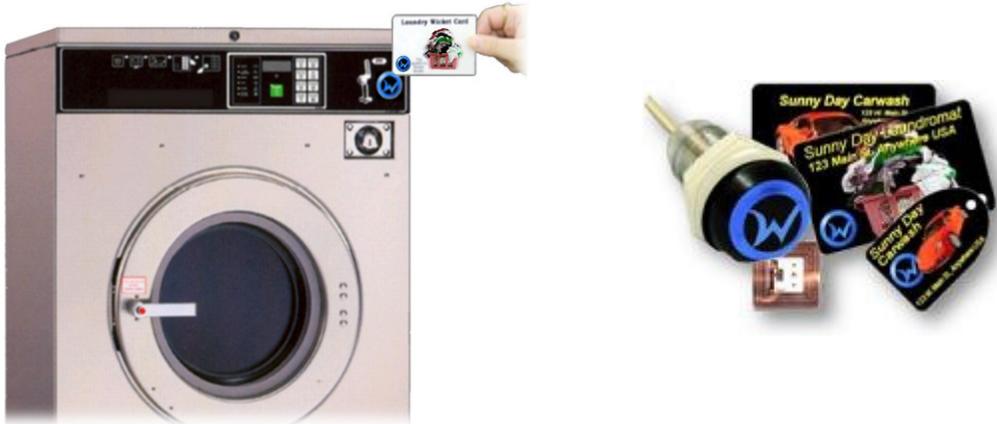

Cashless Stored Value Payment System

Convert To Cashless And Still Accept Coins!

Cashless Stored Value

Our Wickets cashless stored value payment system, designed for the laundry market, finally gives you a way to convert to a cashless card system without having to turn away your cash-only customers. Wickets utilize modern RFID (radio frequency identification) cards that are capable of securely storing value right on the card. It is the same as having bills in your wallet or change in your pocket. When a Wicket is presented to a Wicket Reader, value is debited from the secure memory on the Wicket to start a machine. When the value on the Wicket has been depleted, additional funds may be added back to the Wicket at a Revalue Station. Many advanced technical and marketing features have been designed into the Wickets System as outlined in the below System Features list. Further information is available on our Web site.

System Features:

- **Promotion:** a.) commercial & gift cards, b.) loyalty program, c.) automatic bonusing.
- **Interfaces:** a.) coin pulse output, b.) vending machine MDB, c.) Maytag interface plug.
- **Security:** a.) site specific operation, b.) encrypted card, c.) reader handshake verification.
- **Operation Cost:** a.) nothing to jam, b.) nothing to wear out, c.) no cash box to attack or empty.
- **Revalue Station:** a.) accepts bills and credit cards, b.) dispenses Wickets, c.) revalues Wickets.
- **Turbo Accessories:** a) Jackpot Station, b.) Redemption Station, c.) Night Access Door Controller.
- **Installation Cost:** a.) no extra boxes, b.) no central server wiring, c.) eliminates other acceptors.

IDX Inc., 400 W. Cedar St., El Dorado, AR   71730   800-643-1109   www.idxinc.com   sales@idxinc.com

Wickets:

A Wicket has an RFID (radio frequency identification) transponder chip and antenna laminated inside that is powered by the RF energy of the Reader's antenna when a customer brings a Wicket within about 1/2 inch of a Reader. The Reader interrogates the Wicket, verifies its authenticity via an encrypted handshake, checks it for the correct SiteID, and access the account balance stored on the Wicket using an encrypted password. There's no central server required, the account balance is on the Wicket. Wickets are made in the form of a credit card, or a keyfob easily attached to a key ring.

Readers:

The Wicket Reader is housed in a sealed ¾" threaded tubular body 2.1" long with a 1.1" diameter face. Reading range is approximately ½". A Wicket is easily read by tapping the Wicket's circle-W icon on the Reader's face for a fraction of a second. The normally blue illuminated face of the Reader changes to other colors to indicate the status of a transaction or the status of the equipment as shown in the graphic to the right. The exceedingly small footprint of this Reader allows it to be added to most existing equipment without the need for additional boxes.

- Disabled

Interfaces:

Four interfaces are available to connect the Wicket Reader to your equipment and provide it power. They include "coin pulse" output types for 24VAC and 120/240VAC powered systems, a type with a plug interface directly to Maytag controller boards, and an MDB interface type for revalue stations changers and vending machines.

Revalue Stations:

All base model Changers include a Pyramid bill acceptor, owner interface module, selection buttons, user display, a Wicket reader and a Wicket card dispenser that holds 100 Wickets. Changer options include a receipt printer, credit card acceptor, token hopper, and a CoinCo bill acceptor.

Wickets Administrator

The Wickets Administrator PC based application provides for management of your Stored Value Wickets operation, including: writing pre-set balances to Customer Wickets, doing refunds and redemptions, making employee Service Wickets, creating Wickets for configuring Wicket Readers, and collecting report information from equipment. Wickets Administrator can be freely downloaded and has an evaluation demo mode that allows you to try it out prior to committing to a purchase of any equipment or site licenses.

Wickets Turbo Accessories

Get your Wickets moving in the fast lane! Add these valuable functions with Wickets Turbo Accessories. Wickets Turbo Accessories can be freely downloaded. **Wickets Jackpot:** Attracts patrons to you business to read their Wicket on the Jackpot Module reader for entry into an automated jackpot drawing you sponsor. **Registration-Redemption:** Full registration of a Wicket entitles a patron to Birthday Bonus Bucks and to be able to redeem accumulated loyalty points. **Mailing Manager:** Print and send mail to selected groups of registered customers. **Night Access:** Place a Wicket Reader at your entry door. Only registered Wickets activate an electric strike plate to release the locked door. You'll have a 24/7 business and know who was there.
